

ACSAP 2021 Book 2 (*Women's and Men's Care*)

Release date: July 15, 2021

BCACP test deadline: 11:59 p.m. (Central) on January 18, 2022.

ACPE test deadline: 11:59 p.m. (Central) on July 15, 2024.

Continuing Pharmacy Education Credit: The American College of Clinical Pharmacy

and the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education (ACPE) as providers of continuing pharmacy education (CPE).

ACSAP Target Audience: The target audience for ACSAP 2021 Book 2 (*Women's and Men's Care*) is board-certified and advanced level ambulatory care clinical pharmacists who provide care for patients with common women's and men's health issues.

Module I (5.0 CPE) Women's and Men's Care I

UAN: 0217-9999-21-026-H01-P

Chapter: Contraception Updates

Learning Objectives

1. Evaluate legislative updates related to contraception access and the pharmacist's role in contraception prescribing.
2. Assess patients for impact and scope of unintended pregnancies.
3. Compare and contrast the safety and efficacy of highly effective long-term and emergency contraception products.
4. Evaluate patients for contraception screening and assessment on the basis of CDC medical eligibility criteria and of select practice recommendations.
5. Develop a patient-specific contraception plan for long-term and emergency contraception methods based on advantages, disadvantages, patient preferences, medical eligibility criteria, and screening assessments.

Chapter: Menopausal Symptom Management

Learning Objectives

1. On the basis of patient evaluation, develop optimal treatment for menopausal symptoms.
2. Evaluate risks and benefits of menopausal hormone therapy (MHT) to optimize patient management.
3. Evaluate effectiveness of nonhormonal therapy options for menopausal symptoms.
4. Develop appropriate monitoring and duration of therapy for patients on MHT.
5. Account for clinical controversies related to MHT in designing a patient-centered care plan.

Module 2 (6.0 CPE) Women's and Men's Care II
UAN: 0217-9999-21-027-H01-P

Chapter: Gestational Diabetes

Learning Objectives

1. Assess patients for potential maternal and fetal complications associated with uncontrolled diabetes mellitus during pregnancy.
2. Evaluate the various screening approaches used to diagnose gestational diabetes.
3. Design a complete treatment plan for a patient with a new diagnosis of gestational diabetes, including monitoring recommendations, nonpharmacologic therapy, and pharmacologic therapy.
4. Evaluate the place in therapy for oral hypoglycemic regimens in the treatment of gestational diabetes.
5. Evaluate the place in therapy for low-dose aspirin for pregnant patients with type 1 or type 2 diabetes.
6. Develop a plan for intrapartum and postpartum management for a patient with gestational diabetes.

Chapter: Polycystic Ovary Syndrome

Learning Objectives

1. Assess patients for pathophysiology and diagnostic criteria of polycystic ovary syndrome (PCOS) and its health impacts.
2. Assess the benefit of nonpharmacologic approaches to reduce symptoms of PCOS.
3. Evaluate pharmacologic options for treating PCOS based on patients' symptoms and characteristics.
4. Develop a pharmacotherapy care plan for an individual patient with PCOS, including follow-up and monitoring.

Module 3 (4.0 CPE) Women's and Men's Care III
UAN: 0217-9999-21-028-H01-P

Chapter: Female Sexual Dysfunction

Learning Objectives

1. Evaluate patients for symptoms associated with female sexual interest/arousal disorder (FSIAD), genitor-pelvic pain/penetration disorder (GPPPD), and female orgasmic disorder (FOD).
2. Develop individualized, symptom-based treatment plans for women with FSIAD and GPPPD.
3. Distinguish between pharmacologic and nonpharmacologic treatment options for FSIAD, GPPPD, and FOD.
4. Assess patients for medication-induced sexual dysfunction and recommend alternative treatment plans.

Chapter: Male Sexual Dysfunction

Learning Objectives

1. Evaluate patient risk factors for erectile dysfunction and distinguish between different etiologies of the disorder.
2. Evaluate the role of assessment tools needed to appropriately diagnose patients with male sexual dysfunction
3. Assess the efficacy and safety of pharmacologic options to treat erectile dysfunction.
4. Develop a plan for treatment options for patients who fail or are not candidates for medical therapy for erectile dysfunction.
5. Justify the pharmacist's role in managing patients with erectile dysfunction.

Module 4 (4.0 CPE) Women's and Men's Care IV

UAN: 0217-9999-21-029-H01-P

Interactive Case: Opioid Use Disorder in Pregnancy

Learning Objectives

1. Evaluate the impact of opioid use disorder (OUD) on pregnancy- and neonatal-related outcomes.
2. Distinguish benefits and limitations of current OUD therapies in pregnancy.
3. Using pharmacokinetic and pharmacodynamic alterations expected in pregnancy, design therapies for OUD.
4. Design appropriate therapy for a patient with OUD in pregnancy.
5. Develop a screening plan for common conditions associated with OUD in pregnancy.
6. Design pain management therapy for pregnant women given a diagnosis of OUD during labor, delivery, and postpartum.

Interactive Case: Infertility, Ovulation Disorders

Learning Objectives

1. Assess patient risk factors for ovulation disorders.
2. Evaluate treatment options for patients with ovulation disorders.
3. Develop pharmacotherapy for the patient with an ovulation disorder.
4. Apply knowledge of ovulation disorder treatment to pharmacy practice.
